Thank you for choosing Endo Therapeutics.

History

Endo-Therapeutics, Inc. an endoscopic medical device manufacturer was established in 1992 in Safety Harbor, Florida. At its inception, EndoTherapeutics supplied reusable devices to the market. Today, based in Clearwater, Florida, we have grown to be one of the leading domestic producers of single use biopsy forceps and polypectomy snares in the US. Millions of devices are shipped to customers both in the US and International markets each year. EndoTherapeutics remains committed to supporting the health care industry by continually designing and developing new products.

About us

EndoTherapeutics prides itself on its ability to deliver to the healthcare industry, high quality medical devices. All of our products are 100% designed and manufactured in the United States.

EndoTherapeutics provides contract design and manufacturing services for Class I and Class II medical devices. We offer full service support that delivers the highest quality medical devices to the marketplace. Our ISO 13485 compliant facility has the necessary infrastructure to support all levels of the design and manufacturing process.

Our competitive advantage is in our ability to scale from short run manufacturing to high volume production. Our loyal vendor network combined with our manufacturing expertise enables us to pass along saving to our customers.

BioCeps

A robust family of endoscopic biopsy forceps that meet an array of tissue sampling needs.

Available in coated or uncoated, cold or hot design, with or without a needle-spike. Sized for use in adult and pediatric esophageal, colonic, laryngeal and bronchial applications.

- Sterile
- Single-use, disposable
- Safe and reliable tissue sampling
- Oval fenestrated cup design
- Flexible sheath for ease of scope passage

Millions supplied to the industry since 1992.

eSuction

The latest advancement in foreign body retrieval. Combining snare technology with suction to retrieve food bolus impactions, foreign bodies and excised tissue such as polyps.

- Sterile
- Single-use, disposable
- Snare and suction technology

Made in the USA

Order Number	Description	Fits Scope (O.D.)	Min. Channel	eSuction Cap (O.D.)	Length	Units
ET2000	eSuction, Esophageal	8.6 mm – 10.0 mm	2.8 mm	18.3 mm	230 cm	3
ET2001	eSuction, Colonic	10.8 mm – 13.2 mm	2.8 mm	18.3 mm	230 cm	3

For use with endoscope having a 2.8 mm accessory channel or larger.

SwirlNet

Rotatable for effective endoscopic retrieval of foreign bodies and excised tissue.

- Single-use, disposable
